

2007 Hosting Plan Prices

All Webstream hosting plans provide these benefits:

- Latest Intel & HP servers
- Auckland data centre
- Microsoft ISP licensing
- Cisco Enterprise firewall
- Latest operating systems
- Unlimited traffic
- Multiple domain support
- Nightly site back-ups
- ASP, ASP.NET 1.1/2.0
- MS-Access support
- FTP remote access
- FP Server Extensions
- SMTP domain mail box
- POP3 domain mail box
- Spam/Virus protection
- Site traffic reports
- Business hours support

Traffic usage:

We like to keep it simple. All our standard hosting packages include the cost of your site traffic to and from the Internet. Bandwidth costs us money however, so we do reserve the right to monitor site usage. If you regularly use over 20GB of bandwidth monthly, extra charges may apply.

SQL Database support:

Microsoft SQL 2005 database support is available for all hosting plans at extra cost. For complete control of your database, we recommend using one of our virtual machine or dedicated server plans.

Remote Site access:

All our hosting plans offer remote site editing access using MS-FrontPage, Expression, Adobe Contribute, DREAMWEAVER or FTP.

DotnetNuke Content Management

You can add DotNetNuke (DNN) Content Management to any of our SQL hosting plans for a small increment charge. DNN provides a secure, fully featured content management system running on MS SQL 2005. Edit your site from anywhere, plus over 30 pre-built modules are available to publish pages, images, forms, documents, surveys, discussion groups and much more.

Microsoft SharePoint Services hosting plans

Microsoft Windows SharePoint Services provides an excellent web-based platform for content managed web sites and Intranets. With SharePoint you get a broad range of out-of-the-box tools to enable remote worker productivity and collaboration. SharePoint also provides an excellent foundation platform for sophisticated web-based business applications. Please call for pricing or see our Web site for more information.

Dedicated Servers & Virtual Machines

Not enough resources? See our range of fully packaged dedicated servers and virtual machines. Please see our Web site for full details.
